DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claim 1, which include a method of manufacturing a spectacle lens, where at least one of the front and back surfaces is aspherical, the method having the steps of preparing a plurality of types of semifinished lens blanks that are different in base curve for each of predetermined vertex powers; selecting one type of semifinished lens blank among the plurality of types of the semifinished lens blanks that are prepared for the same vertex power based on considerations of optical performance and outward appearance; and processing a back surface of the selected semifinished lens blank to form a finished lens according to a required specification for the spectacle lens.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
